

MRI Medical appoints Robert Leffler, Technical Director

Tucson, Arizona
November 5, 2010
For Immediate Release

MRI Medical strengthened its executive team with the appointment of Robert Leffler as Technical Director.

Mr. Leffler will lead the company's efforts to expand its technical capabilities, add new development services, and strengthen its product development processes to support rapid growth.

Joseph Lee, MRI Medical President said, "Bob's appointment is a significant step in expanding our commitment to offer world class medical device development services. Bob brings broad engineering expertise as well as project management skills that will help MRI to handle increasingly complex development projects."

Mr. Leffler has over 15 years experience in complex technical product development at companies like Henniges, Ford and Bundy. He has managed global cross functional teams in new product development and has broad experience in operations.

Mr. Leffler has a MS in Industrial Training and Development from Illinois State University, Normal IL and a BS in Integrated Manufacturing Systems, also from Illinois State University.

About MRI Medical

MRI is a 24 year old, full service, OEM designer, developer, and manufacturer of complex medical devices. Its customers include some of the world's largest medical device companies as well as entrepreneurial start-ups. MRI products are found in medical institutions around the world. As a member of the Fenner Group, MRI has expertise in injection molding, thermoplastics, polymers, and medical textiles.
